RISCO Group presents VUpoint, a revolutionary live video verification solution which seamlessly integrates IP Cameras within our professional security systems. Powered by the RISCO Cloud, VUpoint provides an unprecedented level of security and live video monitoring capabilities to Alarm Recieving Centres and commercial/residential users alike, and is easily controlled through RISCO Group's intuitive smartphone app.

- Unlimited opportunity to stream live video events
- Unlimited monitoring capability; anywhere, anytime
- Unlimited types of triggers; detector alarm event, panic, system unset by code
- Unlimited quantity of IP cameras; increasing security and sales potential
- Unlimited potential for installers; simple plug and play installation

Unlimited opportunity to stream live video events

VUpoint enables the initiation of live video streaming on demand from any IP Camera which can be viewed directly using the iRISCO smartphone app or via web application.

Check up on children returning from school, or look in on the office after hours. Wherever there is an IP Camera installed, it can be seamlessly accessed on the go, for peace of mind.

Unlimited monitoring capability; anywhere, anytime

Supported by the iRISCO app, users can monitor intrusion events using snapshot images and live video directly on the intuitive interface, for peace of mind. Alarm Receiving Centres can now... can now identify costly false alarms for higher efficiency. Video streaming uses RISCO Group's HD IP Cameras providing clear and sharp images for verification with certainty.
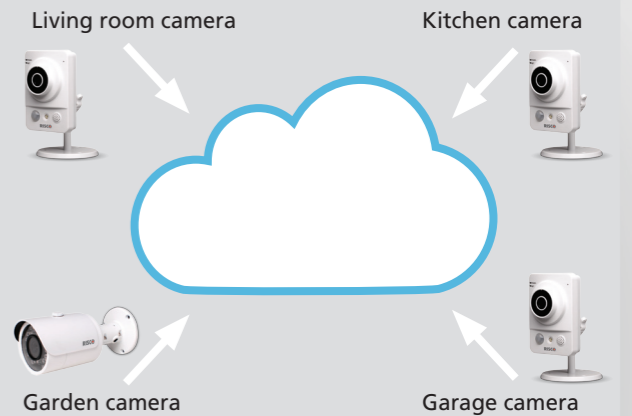

Unlimited types of triggers

VUpoint can be configured so that any detector or event, whether intrusion, safety or panic, can trigger the camera, thereby providing unsurpassed security and control. From a detector to a magnetic contact to a smoke alarm, the camera can be triggered to provide real-time video clips for verification purposes, and peace of mind.

Unlimited quantity of IP cameras supported

With VUpoint there is no limit to the number of IP cameras that can be installed and configured to the intrusion system. IP Cameras are available for both indoor and outdoor environments and provide a cost-effective video verification solution for homes and businesses, in addition to increased revenue potential for installers.

Living room camera

Kitchen camera

Garden camera

Garage camera

Unlimited potential for installers

The option of live video verification will increase the sales potential of all of RISCO Group's intrusion systems and subsequently increase revenues. IP Cameras support simple plug & play installations and do not require additional training or specialized knowledge. In addition, numerous IP Cameras can be sold with every intrusion system, so the potential is boundless.

The full solution includes RISCO Group's intrusion systems, compatible accessories and RISCO IP Cameras.
